Amendments to Specification

Please replace the paragraph at page 11, line 22 through page 12, line 12 with the following replacement paragraph:

One end portion of a cylindrical movement guide member 15 25 is fixed to the outer circumferential surface of the other end portion of the core 16 by well known fixing means, for example, such as welding, so that the guide member 15 25 is coaxially arranged with the core 16. A connection member 26 for connecting with the valve structure 11 is fixed to the outer circumferential surface of the other end portion of the guide member 25. In this embodiment, a male screw is formed on the outer circumferential surface of the connection member 26.
